PROFESSIONAL SUMMARY

Results-driven Java Developer and M.Tech graduate from BITS Pilani with hands-on experience building enterprise-grade software at SAP Labs India. Skilled in full-stack Java development, cloud-native architectures, and agile methodologies. Passionate about delivering scalable, high-performance systems and transforming complex business challenges into elegant software solutions. Seeking a Software Engineer role at a world-class technology organization.

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript, Shell Scripting
Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate, JUnit, Mockito, REST APIs, Microservices
Databases: MySQL, PostgreSQL, Oracle DB, MongoDB, Redis
Cloud & DevOps: SAP BTP (Business Technology Platform), Docker, Kubernetes, CI/CD Pipelines, Git, Maven
Concepts: Data Structures & Algorithms, System Design, OOP, Agile/Scrum, Design Patterns, Distributed Systems
Tools: IntelliJ IDEA, Eclipse, Postman, JIRA, Confluence, SonarQube

PROFESSIONAL EXPERIENCE

- SAP Labs India** Bengaluru, Karnataka, India
Scholar – Software Engineer (Java Developer) August 2022 – June 2024
 - Designed and developed scalable enterprise Java applications on SAP Business Technology Platform (BTP), contributing to core product modules used by thousands of enterprise clients globally.
 - Built and maintained RESTful microservices using Spring Boot, improving system modularity and enabling independent deployment of services, reducing release cycle time by approximately 20%.
 - Collaborated in Agile/Scrum sprints with cross-functional teams across engineering, product, and QA to deliver feature enhancements on time and within scope.
 - Implemented database optimization strategies in MySQL and PostgreSQL, writing complex SQL queries and stored procedures, improving query performance by up to 30%.
 - Wrote comprehensive unit and integration tests using JUnit and Mockito, maintaining code coverage above 85% and significantly reducing production defect rates.
 - Participated in end-to-end software development lifecycle (SDLC) including design reviews, code reviews, and production deployments using CI/CD pipelines.
 - Contributed to internal developer tooling and documentation, reducing onboarding time for new engineers by streamlining technical knowledge transfer.
- Inventron** Bengaluru, Karnataka, India
Software Engineer Intern March 2022 – May 2022
 - Developed and tested software modules for embedded and IoT-based systems, gaining cross-disciplinary exposure in both software engineering and hardware interfacing.
 - Collaborated with a small engineering team to debug and resolve integration issues between software and hardware components, improving system reliability.
 - Wrote clean, documented code and contributed to code review sessions, applying software engineering best practices in a fast-paced startup environment.

PROJECTS

- Scalable Microservices Architecture** | *Java, Spring Boot, Docker, REST API, MySQL* 2023
 - Architected a microservices-based application with services for authentication, data processing, and reporting; containerized with Docker and integrated CI/CD for automated zero-downtime deployments.
- Distributed Database Optimization Engine** | *Java, PostgreSQL, Redis, Spring* 2023
 - Built a query optimization module using Redis caching and indexing strategies, improving read performance by 40%; resolved N+1 query issues using Hibernate ORM fetch optimizations.

EDUCATION

- Birla Institute of Technology and Science (BITS), Pilani** Pilani, Rajasthan, India
Master of Technology (M.Tech), Computer Software Engineering August 2022 – July 2024
 - Relevant Coursework: Advanced Algorithms, Distributed Systems, Software Architecture, Cloud Computing, Database Management Systems, Machine Learning
- Alva's Institute of Engineering and Technology** Mangaluru, Karnataka, India
Bachelor of Engineering (B.E.), Electrical, Electronics & Communications Engineering August 2018 – July 2022

ACHIEVEMENTS & CERTIFICATIONS

SAP Scholar Program: Selected for SAP Labs India's competitive Scholar Program, a merit-based initiative recruiting top engineering graduates for enterprise software development.
BITS Pilani M.Tech: Secured admission to one of India's top-ranked engineering institutions for post-graduate computer science education while working full-time at SAP.
Agile Practitioner: Actively applied Scrum methodology across multiple product sprints at SAP, contributing to on-time feature delivery and improved team velocity.
Certifications (in progress / target): Java SE 17 Developer (Oracle), AWS Certified Developer – Associate, Google Cloud Professional Developer.
